DIRECTORS' REPORT

The directors submit their report and the audited financial statements for the year ended 31 March 2013.

Corporate Profile

The Company was incorporated on 16 March 1999 in Gibraltar. The Company trading symbol is PHPWF though the company shares have never traded in the market.

Photon Power plc is a member of the Borealis Family of Companies and is an indirect majority-owned subsidiary of Borealis Exploration Limited. Borealis Technical Limited (which is a 98% owned subsidiary of Borealis Exploration Limited) owns and controls 5,202,690 shares, which is 99.59% of the outstanding shares.

Like our parent and many Family companies, Photon Power plc is incorporated in Gibraltar.

Activities

The principal activity of the Company is that of researching and developing the Photon Power™ Technology.

Results and Review of Business

The results for the year are shown in the Profit and Loss Account on page 8.

Borealis Technical Limited ("Technical"), the parent company, has conducted basic industrial research on its Photon Power technology since 1997, for which it has patents issued and pending. We have seen interest in Photon Power given the high price of hydrocarbons. We are working on getting satisfactory terms for developing Photon Power which should be competitive using Avto Metals™ Technology for the custom design of eV, electron volt. No transactions have been completed to date, though discussions are under way. All of the research expenditures to date have been undertaken by Technical and funded by Borealis Exploration Limited, the ultimate parent of the Company, though the company is shared in the overhead expenditure of its parent and was charged US\$164,804 (2012 US\$165,000) per year which last year covered all the expenditures on behalf of Photon Power plc.

An Intellectual Property Agreement was signed effective 1 January 2000, whereby Technical has granted the Company the exclusive worldwide rights for sublicensing the Photon Power technology. In consideration for the rights granted to the Company, the Company shall pay Technical an 8% royalty based on net sales of licensed products and services sold by the Company and 50% of all sublicense income. To date the Photon Power technology is still under development such that the Company has not made any related sublicense sales.

The Company has been in the development stage since its inception. The Company intends to retain its sublicense rights granted by Technical. These financial statements have been prepared in accordance with generally accepted accounting principles with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. From inception to 31 March 2011, the Company has lent money raised on its behalf to Technical and Borealis Exploration Limited. The general bad business climate worldwide raises certain doubts about the ability of the Company to continue as a going concern. Management of the Company has been told that its parent company, Borealis Technical, has no intention to demand repayment of the amounts owing from Photon Power to Borealis Technical until the Photon Power technology is being sold in the marketplace. The Company and Technical are working together to negotiate sales or further sublicensing of its technology to various parties, which is expected to generate profitable operations in the future.

DIRECTORS' REPORT (Continued)

To the extent that additional funds are required, the Company will attempt to raise these funds through future sales of its own shares or the sale of rights to use the technology in specific geographic areas or any other financing structure that does not harm the interests of current shareholders. However, there can be no assurance that the Company or its parent will be successful in these actions. The financial statements do not contain any adjustments that might be necessary if the Company is unable to continue as a going concern.

Dividends

There were no dividends declared during the year.
